

AS0040 - ASS12 3U 19" Shelf

Standard 3U 19" Construction

Can house up to 12 PCBs

IDC connections for all ports

Description

The 19" Rack Mounting AS-S12 Shelf is designed to house up to 12 plug in single extended Eurocard Signalling Converters.

User wiring is made to IDC connectors on the rear of the shelf and screw terminal connections are provided for all power options.

The AS-S12 can be powered from a 48V exchange battery or any external approved 48V dc source. Alternatively the unit has an allocated slot for inserting an ASP04 power unit.

& RJ45s

Specification

19" Rack Mounting
3U High

Size : 133(H) X 483(W) X 242(D)
Weight : 2.2Kg

Installation & Testing

Fit shelf into 19" cabinet (3U required)
- Use hank bushes and M6 bolts

Open front panel and fit PSU in RHS slot
- Pass IEC cable through rear aperture

Connect signal wires as required
- Consult installation guide for wire numbers

Fit required sig units into slots from LHS
- Units are on a common 48V supply from PSU
